IN MEMORIAM

IN MEMORIAM

In loving memory of my dear daddy, D. W. Carrvile, who died three months ago the latter part of June, 1958.

God gave me a wonderful daddy,
One of the world's very best.
And when on earth his work was done,
God called him home to rest.

Lettie we knew when dawned that morn,
The sorrow that day would bring.
The end was sudden, the shock severe,
To part with one I loved so dear.
—Sadly missed by daughter,
Mrs. W. H. Almond.

FATHER DARKLEAF
(Continued from Page One)

Lee was entertained.

Rightly, you ask: how come you, a country boy, got to live in such a famous mansion?

Good question.

The Hill estate was never divided, but passed to rightful heirs, mostly living in Baltimore. When my folks moved to Culpeper to pastor several rural churches, in 1920, the Hill home was in the hands of Miss Mildred Hopham, Miss Lucy Wiltshire and Miss Mildred Hill. It was vacant and for rent—so we rented it. As simple as that.

Yes, I have many memories that bind me to Culpeper.

Soil Tests for Fall Seeded Crops

We would recommend that soil samples be submitted now for late summer and fall seeded crops. This would include alfalfa, pasture, small grain and possibly some late seeded Sudan grass or millet. Now is the slack time for the soil testing laboratory and samples can be tested promptly.

The soil test will show whether or not lime is needed. Lime usage is decreasing, which will effect efficient use of the fertilizer and crop production. In 1957 there were 468,000 tons of lime used. 2 million or more are needed to raise pH to where it should be and then 1 million tons each year for maintenance.

The other tests which are, phosphate, potash, calcium, magnesium, and organic matter give an indication of the fertility level of the field. They will be a guide in making the right analysis and amount of the fertilizer recommendation.

Soil boxes and record sheets can be obtained from the county agent's office. Be sure and take a good sample. Instructions are on the back of the soil record sheet.

Wheat Growers To Vote In Referendum

A last-minute reminder to eligible growers about the upcoming vote on 1959-crop wheat marketing quotas was issued today by Floyd Fleshman, chairman, County Agricultural Stabilization and Conservation Committee. The referendum will be held on Friday, June 20, at the Appomattox ASC office. The polls will be open from 8:00 A. M. to 7:00 P. M.

"Eligible" growers, the chairman explains, are those farmers who will have more than 15 acres of wheat for harvest as grain in 1959; since growers with 15 acres or less of wheat and those in the feed wheat program are exempted from marketing quota provisions, they are not eligible to cast ballots on 1959 wheat marketing quotas. A farmer with a signed agreement under the Feed Wheat Program is not eligible to vote.

Chairman Fleshman points out that the vote is on marketing quotas for the 1959 wheat crop, not acreage allotments. Whether or not quotas are approved, wheat acreage allotments will remain in effect as a means of determining the individual grower's eligibility for price support.

The level of the available wheat support will vary, however, according to the outcome of the vote. If at least two-thirds of the growers voting approve the quotas, support will be available on the 1959 wheat crop at a national average of not less than $1.81 per bushel, or 75 per cent of parity. If quotas are not approved by the necessary two-thirds of the votes, support for the crop will be available at about $1.20 per bushel, or 50 per cent of parity. Virginia rates are usually somewhat higher, the chairman noted.

Mr. Fleshman says that if marketing quotas are in effect, there will be penalties on "excess" wheat produced on acreage in excess of farm allotments. The penalty will be 45 per cent of the wheat parity price as of May 1, 1959.

All who are interested in this program, must make a ten dollar deposit before Friday the 27th of June, at the high school office. The office phone is 2632.

Fair trade measure is being pushed in the House.

Appomattox is growing, but is it growing fast enough? The demand for housing, especially, continues pressing here, and despite the maximum efforts of builders, living space is at a premium.

In addition to local demand, a fair pressure is building up from people having employment in new payrolls in Lynchburg, seeking living accomodations in or around Appomattox.

Actually, local builders are having a busy year.

Work is nearing completion on the new Parkway Restaurant on Route 24. Work is also nearing completion on the new building of Martin Webb on Route 460, to house his recapping and service station. The Trinity Methodist Church building projects will be a major item on this summer's construction list. The New Hope Baptist Church parsonage is completed at Vera. And in the town and environs, quite a number of new homes are being built. Included in this group are the homes of J. A. Robinson, Fred Lawson, Dick Bass, Kenneth Coleman and Eugene Franklin.

All of this, coupled with remodeling jobs, painting, and repairing, adds up to keep carpenters, painters, and all those engaged in any connection with the building trade on the busy side.

Work is also progressing on repair work at both the Old and the New Court House areas, the former under the National Park Service, and the latter a repair job from storm damage.

Among business jobs have been the recent remodeling at Inge's Department Store, and the current remodeling at Webb's Service Station for a new business.

MAYOR REPORTS CUT IN TOWN TRUCK TAX

To the Citizens of
The Town of Appomattox:

You fine people are to be congratulated again for your splendid cooperation toward both our 'Clean-up' and 'Safety' campaigns.

Since the change in the garbage collection, I certainly hope that everyone is receiving better service. Please bear in mind that garbage is collected on the north side of the railroad on Mondays and only on the south side on Wednesdays.

The Town Council held its regular meeting on Monday, June 16. A new ordinance was passed at this meeting which requires anyone starting new construction or remodeling in the corporate limits that costs in excess of one hundred dollars to first secure a building permit from the town. These permits are free but if the permit is not secured before construction begins then the town is in no way responsible for any water or sewage problems. Your cooperation will be greatly appreciated concerning this ordinance.

The Council also passed a new ordinance reducing the town tags on all vehicles with a gross weight of over 10,000 pounds to $5.00. This ordinance is effective with the issuing of the 1959 town tags.

Let's everyone continue with your excellent cooperation toward making Appomattox a "cleaner, safer and more courteous town in which to live. Your counsel and advice on all public matters is welcomed at all times.

Sincerely,
C. T. Moores, Jr.

Side-dressing Flue-cured Tobacco

Generally growers who use adequate amounts of the right and suitable fertilizer for their conditions, will not need to make side applications. Experiments conducted at the Chatham Station show that side-dressing with an 8-0-24 will pay well under the following conditions:

1. When relatively light applications of fertilizer were made prior to transplanting.

2. When heavy leaching rains occur within the first few weeks after transplanting. This is especially true on light sandy soils.

Fertilizer applied as a side-dressing should be applied within three weeks after transplanting. Later applications often delay maturity and lower the quality of cured leaf. It should also be remembered that more fertilizer does not necessarily increase yield. These are points growers should consider in deciding whether or not to use additional fertilizer on their tobacco this year.
